

Occupation: Retired Software Engineer and Manager

Age:54

As a homeowner and resident of Carmel-By-The-Sea, I feel that our community is falling away. We have seen our permanent resident population drop by 30%, our resident oriented businesses close, and our public spaces neglected. Knapp Hardware. Both of Carmel's automobile repair shops. The Scout House. The Scenic Pathway. Mission Trail Nature Preserve.

As a councilmember, my top priority will be to restore our vibrant community. To make those difficult decisions, we need a city council that works well: a council that gets along; a council that communicates with and respects its constituents; a council that protects and enhances our residential way of life; a council that plans for the future that the community envisions; a council that lives within its means.

My professional experience managing people and projects shows that I have the skills required. My record of serving as a Forest and Beach commissioner, volunteering at Harrison Memorial Library, and speaking on issues important to Carmel demonstrates my willingness to serve the village.

I am proud to have the support of Ken White, Barbara Livingston, and many others, and I humbly request your vote so that I can work to unite and serve our community.
