

CARMEL-BY-THE-SEA

PLANNING COMMISSION MEDIAN LIGHTING SUBCOMMITTEE

PUBLIC WORKSHOP #1

**September 16, 2014 – 5:00 p.m.
Council Chambers
East side of Monte Verde Street between
Ocean and Seventh Avenue**

The purpose of this public workshop is to discuss and decide upon the approach for exhibiting different lighting options for the City's Ocean Avenue Median. This will **not** be a meeting to discuss the lighting policy itself, or which lighting treatment is preferred. That will be the subject of future workshops.

As an initial step, the Median Lighting Subcommittee has developed a list of different lighting treatments to try as well as a suggested methodology and duration for each treatment. At this first public workshop, the subcommittee wants input from the community on:

1. The different treatments that should be tried,
2. The length of time for display of each treatment,
3. The number of different treatments that should be displayed at a time.

Thank you for your input and participation.
