## Setback Requirements

A setback is a required distance that a structure or object must be located from the property line. Setback requirements depend on the zoning, size, and shape of the lot. See the table below for setback requirements

| Lot Type | Front Setback (feet) | Rear Setback* (feet) | Side Setbacks |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Composite (both sides) | Minimum Side Setback (feet) |  |
|  |  |  |  | Interior Side | Street Side |
| Interior Site | 15 | $3 / 15$ | $25 \%$ of the site width | 3 | n/a |
| Corner Site | 15 | $3 / 15$ | $25 \%$ of the site width | 3 | 5 |
| Resubdivided Corner Site | 10 | $3 / 15$ | $25 \%$ of the site width | 3 | 9 |
| DoubleFrontage Site | 15 | $\mathrm{n} / \mathrm{a}$ | $25 \%$ of the site width | 3 | 5 |

* The rear setback is 3 feet for portions of structures less than 15 feet in height. If the structure is 15 feet or taller, a 15 foot setback is required from the rear property line.

The Composite Setback is the sum of the two side-yard setbacks. The sideyard setback cannot be less than 3 feet on either side or equal to less than $25 \%$ of the lot width on both sides. See the image below for a variety of setback combinations that equal $25 \%$ of a 40 foot wide lot

## Height Limits

Measuring Height: The height of a building is measured as the plumb vertical distance from existing or finished grade (whichever is lower) to the highest point on the roof.

Height limitations are summarized below:

|  | R-1 District | R-1-BR District | R-1-PO District |
| :--- | :--- | :--- | :--- |
| Number of Stories Allowed | 2 | 2 | $1^{*}$ |
| Roof Height of $1^{\text {st }}$ Story | 18 feet | 18 feet | 18 feet |
| Plate Height of $1^{\text {st }}$ Story | 12 feet | 12 feet | 12 feet |
| Roof Height of 2 $^{\text {nd }}$ Story | 24 feet | 18 feet | 24 feet* |
| Plate Height of $2^{\text {nd }}$ Story | 18 feet | 18 feet | 18 feet* |

*R-1-PO (Park Overlay) District: The Planning Commission may grant a $2^{\text {nd }}$ story if determined that the height will not negatively affect the nearby park or open space.
