CITY OF CARMEL BY THE SEA

COMMUNITY PLANNING AND BUILDING DEPARTMENT

SITE PLAN SKETCH REQUIREMENTS FOR TEMPORARY AND PERMANENT ENCROACHMENT PERMITS AND DRIVEWAY PERMIT APPLICATIONS

General Requirements:

- Site Plan Sketch should be drawn to scale, or to approximate scale with key measurements (driveway width and length, pathway width and length, property line lengths) noted
- Include North arrow
- If a supplemental sheet, Site Plan Sketch should be on an 8.5"x11" sheet
- If on a supplemental sheet, include Project Address, APN, Owner's Name, and Date

Project Information:

- Show and call out all property boundaries with street frontage.
- Label streets with street names
- Note all improvements in the City Right-of-Way (ROW) for adjacent roadways. Identify the street, the edge of the pavement, and depict existing and any proposed improvements within the ROW.
- Show the location of the main building or edge of the building
- Depict existing and any proposed hardscape in the area of work (driveways, patios, paths, etc.), and note existing and proposed. Include dimensions or widths and call out materials (asphalt, pavers, decomposed granite, etc.)
- Show any areas proposed for staging of construction or demolition materials.
- Show all existing trees with a trunk diameter > 2 inches that are within 10 feet of all work areas. Call out approximate tree diameter and species, if known.

Last revised: March 2016

Right-of-Way Vision Statement

In most neighborhoods, the edges of the public right-of-way (between the road edge and adjacent private property lines) are unpaved. The right-of-way is often left unplanted resulting in an informal character of volunteer plantings, packed earth and pine needles. The right-of-way is also often planted with indigenous species consistent with a forest appearance. Both approaches contribute to a linear green belt appearance that helps to create the “village in a forest” character that defines the City.

The City has adopted clear standards that guide the treatment of the right-of-way in the residential district. These standards can be found at www.ci.carmel.ca.gov or at the Department of Community Planning and Building located at City Hall. Some of these standards include:

- Drought-tolerant, native plants, informally arranged may be permitted.
- Formal plant arrangements with highly colorful flowering plants are prohibited.
- When possible, plantings should not extend to the street edge to allow for off-street parking.
- Paving, gravel, boulders, logs, timbers, planters or other above-ground encroachments are prohibited, except paving for driveways, unless an encroachment permit has been obtained from the City.
- A narrow crushed Decomposed Granite pathway from the street to the property entrance may be allowed without an encroachment permit.

The City is requesting your assistance to ensure that the right-of-way adjacent to your property complies with City standards. If you would like assistance in determining whether the right-of-way adjacent to your property is out of compliance, please contact the Department of Community Planning and Building at (831) 620-2010.

City of Carmel-By-The-Sea

TRAFFIC CONTROL PLAN – 2018 HANDOUT

Objective:

The objective of a Traffic Control Plan (TCP) is to permit a contractor, utility, or developer to work within the public right-of-way in a safe, efficient, and effective manner while maintaining a safe, uniform flow of vehicle traffic. Additionally, a TCP ensures safe provisions for bicyclists and pedestrians to bypass the construction Work Zone.

TCPs shall be submitted to the Community Planning and Building Department at Carmel City Hall on Monte Verde, between Ocean and 7th Avenue, at least 48 hours prior to obstructing any travel to allow for Public Works review and approval and for notifications to the Carmel Police and Fire Departments.

A TCP must be submitted to the City for approval in the following circumstances:

1. Obstructing one or more travel lanes along any arterial street: Carpenter Street, Junipero Street, Ocean Avenue, Rio Road, and San Carlos Street (south of Ocean).
2. Obstructing one or more travel lanes along the truck and bus routes (including portions of 2nd Avenue, 8th Avenue, Carpenter Street, Junipero Street, and San Carlos Street (south of Ocean).
3. Obstructing one or more travel lanes along any of the following collector streets: 4th Avenue (west of Dolores), 8th Avenue, Camino Del Monte Avenue, Mountain View Avenue, San Antonio (Ocean to Santa Lucia), Santa Lucia (east of Dolores), and Scenic Drive.
4. Obstruction of one travel lane in a residential area for more than eight (8) hours.
5. Obstruction of one travel lane in the business district for more than four (4) hours.
6. All proposed road closures.

Note: As an alternative to obstructing traffic, parking spaces can be purchased on a day-by-day basis by contacting the Executive Assistant at City Hall at phone number (831) 620-2000.

Traffic Control Plan Preparation Requirements:

Every TCP submitted for City review and approval must conform to the following guidelines:

1. TCP shall reflect actual job site conditions.
2. TCPs shall be prepared to scale on 24" x 36" or 11" x 17" sheets.
3. Use legible lettering.
4. Provide a legend for symbols used.
5. Provide a north arrow.

6. Provide a “USA/811 Call Before You Dig” warning stamp.
7. Lay out streets in proper orientation and label streets.
8. Indicate posted speed limits.
9. Show and label (or use legends for) existing crosswalks, bike lanes, parking spaces, striping, ADA ramps, berms, and drainage facilities.
10. Show existing regulatory signs in the vicinity of the construction Work Zone.
11. Identify the type of construction (i.e. install gas line, pave new driveway).
12. Indicate location and dimensions of the proposed construction Work Zone.
13. Show your proposed equipment/materials staging area, if applicable.
14. Note the contractor’s business name, address, phone number, and license number.
15. Note the name and phone number(s) of 24-hour contact(s) for emergencies.
16. Indicate the proposed start date and estimated construction completion date.
17. Label proposed temporary construction signs, barricades, delineators, flaggers, etc.
18. Label proposed taper lengths, width, and delineator spacing.
19. Label signs/barricades to navigate bicyclists and pedestrians around the Work Zone.
20. Label any proposed temporary parking restrictions.
21. Copy the following General Notes onto the TCP.

Traffic Control Plan General Notes:

1. All traffic control devices shall conform to the latest edition of the California Manual on Uniform Traffic Control Devices (MUTCD).
2. Work hours are 8:00 am – 6:30 pm Monday-Friday, and 8:00 am to 5:30 pm on Saturdays.
3. Any night work will require prior written approval from the Community Planning & Building Department.
4. The contractor shall maintain traffic control devices 24 hours per day, 7 days per week.
5. Traffic control devices shall be removed from view when not in use.
6. Travel lanes through construction sites shall be at least 12 feet wide.
7. Temporary “No Parking” signs must be posted at least 48 hours prior to work.
8. Open trenches must be backfilled or plated during non-working hours.
9. A flashing arrow board is required prior to the taper for arterial lane closures.
10. Workers shall wear visibility vests in the day and reflective vests at night.
11. Flaggers shall be trained in the fundamentals of flagging traffic and equipped with a vest, hard hat, and C-28 “Stop/Slow” paddle.
12. TCPs for construction work along an arterial street or within the downtown business district shall be signed and stamped by a registered Civil Engineer or Traffic Engineer.
13. Road closures and detours require prior written approval by the Director of Public Works.
14. The Director of Public Works, Director of Public Safety, or designee, are authorized to order changes to assure public safety.

PG&E Urges Customers to Always Call 811 to Avoid Damaging Utility Lines in Carmel-by-the-Sea

CARMEL-BY-THE-SEA, Calif. — With spring's warmer weather comes an abundance of pre-summer outdoor projects that require digging. To prevent damage to underground utility lines in Carmel-by-the-Sea, Pacific Gas and Electric Company (PG&E) urges customers to call 811 before starting any project that involves digging.

"Whether you are planning to do it yourself or hire a professional, you should always call 811 before each job to have underground utility lines marked," said Rob Morse, senior manager of PG&E's Central Coast division. "It's a free and easy service that protects public safety and helps avoid damage to utility lines, service interruptions and fines."

Last year, there were more than 1,735 strikes on PG&E's underground infrastructure – six of them in Carmel-by-the-Sea. This year, the city has experienced two dig-ins. Fencing, water and sewer projects are the top three activities that have resulted in underground utility strikes in Carmel. Of the 1,735 strikes in 2016, more than 55 percent had not called ahead to have underground utility lines properly marked. The average cost to those who damaged PG&E's underground utility lines, including fines and repairs, amounted to \$7,500.

About the 811 Free Safety Service

811 is a free nationwide service that sends utilities to mark the location of underground lines, including gas, electric, water and fiber optic services. Underground Service Alert (USA) North, which operates 811 in PG&E's service area, created 811express.com to reduce demand to the 811 call line and provide a convenient way for the public to request utility markings.

Homeowners and contractors can prevent gas leaks and power outages while protecting themselves and the safety of their community by requesting a USA ticket. Contractors are required by law to contact 811 at least two working days prior to excavation, but any digging project requires a USA ticket, including planting a tree or setting posts for a picket fence.

About PG&E

Pacific Gas and Electric Company, a subsidiary of PG&E Corporation (NYSE:PCG), is one of the largest combined natural gas and electric energy companies in the United States. Based in San Francisco, with more than 20,000 employees, the company delivers some of the nation's cleanest energy to nearly 16 million people in Northern and Central California. For more information, visit www.pge.com/ and pge.com/news.
